## A NEW WAY TO LOOK AT CNG FUELING

Equipment That Does More, Supported by People Who Care More

# THE PEACE-OF-MIND DIFFERENCE IN CNG FUELING

## CNG FUELING EQUIPMENT

**Reliable Solutions** for time-fill (shown above) or fast-fill CNG fueling stations.

### Portable, Modular CNG Fueling

Mighty Modular Fueling Systems are affordable fueling stations for small to medium fleets, and a simple entry method for those just starting to fuel with CNG. They flexibly and easily expand, as fueling needs grow. These are the only systems that can expand up to 4 compressors, to fuel up to 20 trucks in just a few hours. Fuel your fleet at night when rates are lower.

### Our Enclosures Make the Difference!

Ergonomic design for comfort and safety. Open access and elbow room for quicker repairs and maintenance.

## UNINTERRUPTED FUELING SERVICE

### Best Uptime in the Industry

CMD systems consistently remain operational, even in harsh weather conditions - even when other brands fail.

High-performance, robust design, rigorous manufacturing and testing standards and wrap-around service support all contribute to our pledge of uninterrupted service for your customers.

## SOLUTIONS AND APPLICATIONS

### Extensive Product Portfolio

CNG Compression Systems are configured for your fueling requirements. Compressors are available in a wide range of flow rates, and systems come complete with storage, inlet dryer, system controls and fueling dispenser. Walk-through, lighted enclosure design improves maintenance and operational efficiency.

### Markets

CMD is a trusted partner for key CNG markets. We will provide the best fueling experience for your customers, and we work well with any fuel supplier:

- Construction
- Municipal
- Over-the-Road
- Delivery
- Bio Fuel/RNG
- Agricultural and Landfill

### Application Solutions

We are the best partner for a variety of fueling situations, and our solutions include:

- Virtual Pipeline
- Mother-Daughter Stations
- Pressure Reduction Systems
- Pressure Boosters
- Fast-Fill or Time-Fill Dispensers
- Defueling Solutions

## STATION MONITORING

### 24/7/365

- Remote monitoring of CNG stations and equipment by friendly, trained CMD personnel
- Live camera feed provides real-time accuracy
- Diagnosing and correcting potential problems before they interrupt service
- Handling of all service calls and questions from drivers and operators
- Quick service dispatch when required
- Thorough follow-up to confirm customer satisfaction with service solutions
- Analytics and reporting of station performance
- Customers can access our convenient status board from their phone or other device

## SERVICE

### Training and Parts

CMD offers CNG station owners and operators comprehensive and customizable service plans to prevent service interruption, ensure safety, and prolong the life of your station and equipment.

- Experienced technical service and quick response with nationwide network of experts
- Scheduling of regular preventive maintenance to reduce the occurrence of field issues or fuel service interruption

### Training Classes for CNG Technicians & Station Personnel

- Station Maintenance for CNG Fueling Equipment
- Operating CNG Fueling Equipment
- Preventive Maintenance for CNG Fueling Equipment

### Convenient Parts Ordering

- Quick delivery of critical replacement parts
- Easy parts ordering and knowledgeable advice
- Our goal is to minimize your downtime

## WRAP-AROUND SUPPORT
