

**Elvi**

residential plug-in charging solution

**EVBOX**

Hello,

I'm Elvi,  
the only charging station  
you'll ever need.  
I'm the perfect companion  
for any home or apartment.

Ready to charge up?

-  Up to 7.2 kW
-  Powered via NEMA 6-50 plug
-  Wi-Fi and Bluetooth enabled
-  18 foot cable
-  OCPP 1.6+ compliant
-  Plug 'n Charge
-  Durable, future-proof
-  3-5 year warranty
-  Modular and sustainable design

# I'm valuable

profitable, praiseworthy

At 6x faster than a standard wall outlet, charging with me means starting the day with a full battery. Everything about driving an electric vehicle should be convenient. And with me, it is. But that's not all.

## Increase property value

I'm an easy way to add a profitable new amenity. Think of me like granite counter-tops or stainless steel appliances—a small investment that creates lasting value.

## Be competitive

EV drivers are multiplying every day. Keep your site on their radar by meeting their needs, and impress them with my superior look and feel.

## Stay up to code

With me at your location, you'll meet any new building requirements for EVs. Plus, having me goes a long way for helping you qualify for LEED, GBB, or WELL.

# I'm stunning

stylish, robust

## Smart — intelligent design

Track charging sessions from the palm of your hand and use your available power in an efficient and cost-effective way. I make smart charging simple.\*

## Sleek — attractive aesthetic

Your car and home reflect your style—shouldn't your charging station? With my clean lines and features, you get a station that not only performs, but looks great doing it.

## Durable — tough and reliable

Weatherproof, shockproof, and rated for both freezing and scorching temperatures, I'm built for the long haul. Just plug in and charge up—anywhere, every time.

\* Smart features will be added to all Elvi stations as an over-the-air upgrade (anticipated fall 2019). No hardware upgrade required.

# I'm effortless

upgradable, timeless

When you get an electric vehicle charging station, you want to get one that will last. With me, you get an EV charger that is ready for whatever life throws at it. I make it easy to find a configuration that suits your needs, and I'm always prepared for the future.

## Easy install — no hardwiring required

With a NEMA 6-50 plug, getting me installed is as easy as plugging in a vacuum. Simply hang me on the wall and plug me in—now you're ready to start charging!

## Wi-Fi and Bluetooth enabled — data-free connectivity

Upgradable over-the-air with the tap of an app, keeping me up-to-date has never been simpler. And Bluetooth ensures that you can always pair with me.

## Modular design — simple and secure

I'm just three pieces—the wall dock, the station, and the charging cable. Each piece is easily detachable, meaning setup is a cinch (as well as any future enhancements).

# I'm yours

you are in charge

Whether you're looking for a station for your home, or a couple of stations for your apartment complex, I'm the perfect choice. Upgradable, reliable, durable, and sleek, I'm a smart station that will exceed all your EV charging needs.

## I'm there for you

No matter where you install me, I'm ready to give any cars a reliable charge up. And with no hardwiring required, if you need to change locations, bringing me along is a snap.

## I give you control

With an adjustable output and multiple configuration options, you can set me up to use as much or as little power as you want, and give access to whomever you want. I accommodate for you.

## I fit right in

Never worry about if you got the right EV charging solution for your location. From small single family homes to large apartment complexes, no matter where you are, I'll support you the best.

## Plant one tree for every charging port installed

At EVBox, we're on a mission towards zero emissions, and not just by accelerating the transition to electric transportation. That's why, for every EVBox charging port installed, we donate a tree to help reforest an area affected by climate change. As part of our [OneChargerOneTree](#) initiative, EVBox is partnering with several reforestation partners around the world (including OneTreePlanted) to reverse the damage done to our home. Lend a hand in helping create a greener future by choosing EVBox.
