

# Electric Vehicle Fleet and Energy Management Solutions

Save energy and infrastructure costs, while ensuring that your fleet is charged and ready.

**Reduce charging costs** by minimizing demand charges and time of use rates

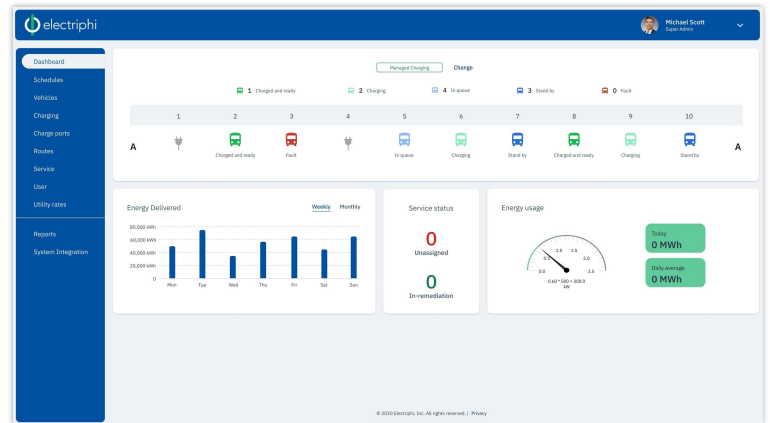

**Optimize EV fleet charging** based on energy rates, schedules, and more

**Comprehensive reporting** to show energy consumption, GHG savings, and LCFS credits

## Ensure EV readiness and control energy costs

## Comprehensive yet Flexible for your fleet operations

**Single dashboard** for managing all your vehicles - electric and ICE

**Full compatibility** with any charger, vehicles, and open industry standards

**Scale your fleet** with grid-scale platform and API based architecture
