

PARTNER WITH PROTERRA

POWERING THE SHIFT

With a proven 14-million-mile track record, the Proterra® electric bus is the best-performing vehicle of its kind on the road. Now, other industry-leading commercial vehicle manufacturers around the world are choosing to integrate Proterra powertrains into their own iconic vehicles.

These **Proterra Powered™** vehicles include Daimler's Saf-T-Liner C2 Jouley school bus from Thomas Built Buses, the Van Hool CX45E high-floor coach bus, the MT50e electric delivery truck from Freightliner Custom Chassis Corporation, the S1LF low-floor shuttle bus from Optimal-EV, and the electric 12.5 meter transit bus from Bustech.
