Fluid Analysis Program

Get the best out of your equipment

The Program:

Valvoline Fluid Analysis program is a lubricant and fluids condition monitoring service designed to help our customers achieve significant cost savings and optimize fleet maintenance practices.

It helps to detect problem causing contaminants and out of line wear rates in engines, transmissions, gear boxes, hydraulic systems, other oil lubricated mechanisms and coolant systems and help our customers to predict and prevent catastrophic equipment failure.

AMERICAN OWNED & OPERATED

VALVOLINE™ FLUID ANALYSIS

WHY IS FLUID ANALYSIS IMPORTANT

Now, more than ever, routine oil analysis is key to a successful maintenance program. Detection of problems before they become failures saves you time and money. We understand that when your equipment is down you lose money. Whether your equipment runs on-road or off, Valvoline keeps your fleet where it belongs!

It all starts by analyzing your fluid. Liquid alteration and oil degradation are leading indicators of other negative outcomes such as: generalized corrosion, cylinder liner pitting, water pump failures, premature/corrosive wear, and deposit formation.

PROGRAM GOALS & BENEFITS:

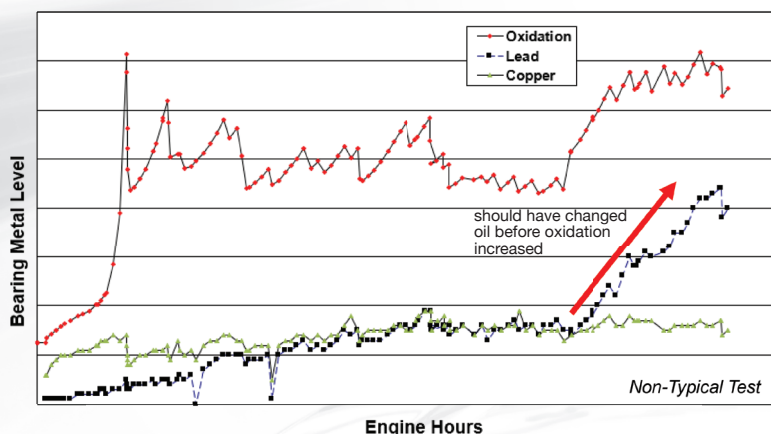

Our Goal is to help our customers protect their investment & increase ROI by preventing catastrophic failures, reducing operational downtime and complimenting other maintenance practices. Valvoline works directly with our customers to help them analyze data and make adjustments to their maintenance practices to ensure their fleet performance.

OTHER BENEFITS INCLUDE

- Reduced maintenance cost - you can save money and time (and perhaps avoid a breakdown) by making inexpensive component repairs before they become more time consuming and costly
- Extended equipment life - you can maintain an efficient and reliable fleet by warding off unnecessary equipment downtime and costly repairs
- Extended lubricant & coolant life - We analyze and interpret data to help optimize fleet performance and get the most out of the fluids you use

OUR ADVANTAGE

Our team helps your fleet analyze your fluid data. We make sense of the reports and provide recommendations based on your maintenance practices to help optimize your fleet. Our hands-on approach and expertise is unrivaled amongst industry leaders.

ACCOUNT SET UP

- Please contact your Valvoline sales rep for assistance in new account set up
- Order your Valvoline Oil Analysis Kits & set up new accounts by sending an email request to valvoline@alsglobal.com
